

JUMPING RASCALS

Safe Work Method / Risk Assessment Plan

This Risk Assessment has been prepared to determine the hazards which may occur whilst using THE INFLATABLES and their associated equipment.

Refer to X, Y and Z below for criteria descriptions...

Hazards	Consequence	Affects Who?	Cause	Control Measure	Consequence Category [X]	Likelihood after Control measures [Y]	Residual Risk [Z]	Who?
Vehicle & Equipment Manoeuvres	Bodily Injuries	Staff Onlookers	Hasty movements Uncontrolled Access	Extreme care taken whilst positioning Marksman to be used when positioning Pedestrians to be redirected if necessary	Minor	Unlikely	Low	
					Minor	Unlikely	Low	
					Minor	Unlikely	Low	
Loss of Electrical Power	No Lighting	Participants Staff	Loss of power Generator out of Fuel	Regular fuel Checks Single lead into separate power outlet Switch to the generator Ceases operation	Insignificant	Unlikely	Negative	
General trip Hazard	Bodily Injuries	Participants Staff Onlookers	Poor Cable routing Non-removal of bollards	Cable routes to be protected Bollards to be removed	Minor	Unlikely	Low	
Sun Exposure	Sunburn	Participants Staff	Poor sun protection	Supply of sunscreen Operators to wear hats	Minor	Unlikely	Low	
Crowd congestion	Bodily Injuries	Participants Staff	Poor crowd control	Working area to have barriers to control the crowd	Minor	Unlikely	Low	
High Winds	Castle Stability concerns	Participants Staff	Incorrectly operated or Installed during adverse weather	In accordance with Manufacturers instructions Do not use in adverse weather conditions Equipment to be erected & operated by fully trained operators	Minor	Unlikely	Low	
Lightning conduction	Bodily Injuries	Participants Staff	Severe storm conditions with tall structure	If lightning is present all Participants to be evacuated	Minor	Unlikely	Low	
Falls From Inflatable	Bodily Injuries	Participants Staff	Rough play Climbing on exterior walls Jumping off	Staff trained to supervise Ensure no climbing on Walls or jumping off	Minor	Rare	Low	

Larger Participants colliding with Smaller participants	Bodily Injuries	Participants Staff Onlookers	Overloading of the inflatable Mixing age groups Rough play	Participants put into age And size groups Adult supervision ensure correct number of Participants are on the inflatable	Minor	Rare	Low	
Jewellery / sharp Objects/shoes/ Food/drink	Bodily injuries choking	Participants		Removal of objects No food shoes Staff monitor participants	Minor	Rare	Low	
Petrol Blower / generator	Bodily Injuries Risk of fire or burning	Participant Staff Onlookers	Fuel not stored correctly Poor supervision/fencing	Correct supervision of all participants are to be in the front of the inflatable Spare fuel to be stored in correct container and in suitable safe location Switch unit off during refuelling	Minor	unlikely	low	
Trapped at height	Panic	Participant	Fear of height Clothing entanglement	Sensible Clothing to be worn	Insignificant Insignificant	Likely Moderate	Low Negative
